TSAR'S REPORT.

Shows That Officers Took Sides with the Mutineers.

The humorous side to the mutiny on the Potemkin is rapidly developing.

Before leaving Kustenji the ringleaders issued a bombastic proclamation in which they declare war on all Russian vessels that do not join them. It seems likely that before they are able to carry out any part of this programme dissensions in their own ranks will bring about their undoing.

About a hundred of the crew demanded to be put on shore at Kustenji, and were so insistent that they threatened, if they were not landed, to throw themselves into the sea.

Never probably has a European Power had to make public such a humiliating document as the official account which appeared yesterday in the "Official Messenger," the Government organ, of the mutiny at Odessa. Littl' attempt, apparently, has been made to minimise the gravity of the events on the

Before leaving the delegates handed the Prefect a number of copies of a proclamation in which the mutineers solemnly declare war on all Russian vessels that do not join them. They add that they will respect neutral territory and also foreign shipping, whether mercantile or naval, but that they are going to bombard Russian at any cost.

This decision they request shall be notified to the whole of Europe.

HUNTED BY TORPEDO-BOATS

Obssa, Tuesday.-According to information from trustworthy quarters, torpedo-boats manned with volunteer crews of officers are engaged in cursuing the Knitz Potemkin. The Black Sendron is expected here again to-morrow.

Is reported that the Knitz Potemkin was ad off Odess in the true again to-morrow.

The Kiniar Proteins accompanied by torpedo-boat No. 267, left Sevastopol on June 23, for Tendrovo Bay, for firing practice. On the 27th the crew, on the pretext of the bad quality of the meat brought by the torpedo-boat from Odessa; refused to eat the soup.

"The scrond officer was beginning to write down."

"The second officer was beginning to write down
the names of the sailors who refused the food when
they seized the rifles which were piled on deck and
proceeded to load them. The order to fire on them
was not obeyed by the guard, and the second
officer, snatching a rifle, fired two or three times
on a sailor and wounded him mortally,
"The mytiques sailors then fired vollars on the

"The mutinous sailors then fired volleys on the officers, pursuing them to different parts of the ship. Some officers jumped into the sea but were fired on and killed in the water, even 47-millimetre guns being used.

The mutineers shelled the torpedo-boat and put under arrest those officers who remained alive On board the battleship a committee of twenty sailors was organised, which took command of the ship and gave orders that she should proceed to

"The troops could not use their arms against the workmen in the vicinity of the harbour for fear of an enfilading fire from the ironclad, and the harbour was thus at the mercy of the mob, which pillaged the warehouses, the vessels lying at the wharves, broached casks of wine and spirits, got drunk on the contents, and threw quantities of goods into the sea. goods into the sea.

"With nightfall fires began which soon attained terrible dimensions. Nearly everything in the harbour was destroyed, the mob refusing to allow the firemen to fight the flames.

alive in a state of intoxication.

"The damage done can only be estimated in millions of roubles. None of the representations of foreign Powers suffered, the Consulates being guarded by troops.

"At seven o'clock on the morning of the 30th Vice-Admiral Kruger and Rear-Admiral Vichnevetzky's squadron arrived. On the squadron approaching the Odessa Pier, the Kniaz Potenkin, cleared for action, advanced to meet it and cut through its line.

OFFICER BLOWS OUT HIS BRAINS.

"As it passed it reached an ovation from the ironclad Georgei Pobiedonosets. The Admiral gave the signal for the squadron to return to Sevastopol, but the crew of the Georgei Pobiedonosets did not allow that vessel to follow, and put the commander, and all the officers ashore, disarmed, except Lieutenant Grigorieff, who blew low his being.

"While the negotiations were proceeding between the officers and the mutineers on board the Georgei Pobiedonosets, torpedo-boat 267 brought from the Kniaz Potemkin to the Georgei Pobiedonosets several students and sailors, who took officers overboard. This, however, the sailors

"The Minister of Marine has received the following telegram from Admiral Kruger: 'The crew of the transport Prout, when leaving Tendrovo Bay, mutinied, arrested the captain and officers, and killed Second-Lieutenant Nestertzeff and Boatswain Kozlitine. The Prout has arrived at Sevastopol. The crew is repentant, and has re-leased the captain and officers, and an inquiry into the affair has begun.'

Kept Up Discussion Till Daylight Over a Money Bill.

The masterful tactics of the Chancellor of the Exchequer were responsible for the House sitting yesterday morning until nearly half-past three.

Anxious to get the Consolidated Fund Bill passed, he took advantage of the rule which permits a money Bill to be taken after midnight, and without giving notice to the Opposition, or even consulting his colleagues, declared his intention of forcing the Bill through.

The Opposition were furious, and, led by Mr. Winston Churchill, they gave the autocratic Chancellor a warm three hours. The debate was due, said the member for Oldham, to "the abominable discourtesy of the Chancellor of the Exchequer."

After two hours' heated wrangle, the closure
was moved, and straightway calls of "Gag!" arose,
mingled with cries of "You are bullying the
House." Excited members shouting to points of
order, grabbed at the nearest hats to conform to
the rule of remaining seated and with head covered
while raising such casits. while raising such points.

In most cases they clutched the wrong hats, and presented a ludicrous and sometimes a semi-extinguished appearance as they vainly pealed their protests.

Finally progress was reported as daylight began

to stream through the windows.

Considerable surprise has been created by the drastic nature of Mr. Balfour's motion to apply the guillotine to the Aliens Bill after to-morrow night.

The Government (says the M.P. who represents the The overment, (asy the Lobby) is not so influenced by the merits of the Bill as by the fact that their bus-ness is in a state of muddle, and the guillotine is the only resource if the House is to rise on August 12.

PAIRS, Treasday.—The French Chamber, after an all-night sitting, has decided by 341 votes to 243 on the separation of the Church from the State. The step, although only the logical outcome of recent events, is a momentous one, and marks an epoch in the history of France. The connection between Church and State, established since the time of Napoleon, is now finally severed.

COMMONS.

"JACK THE INKMAN."

AISS DOUGHTY. Victim's Mental Photograph of the Miscreant.

That imp of mischief, "Jack the Inkman," who by squirting ink over them has ruined more pretty frocks in a fortnight than the weather could ruin in a year, was in every West End policeman's mind's eye yesterday. It was feared that he would regard the summer sales as his opportunity.

His description was read out to the squads of constables at Vine-street and Marvlebone as they sallied forth to their beats yesterday afternoon.

They were to keep a sharp look-out for a

Short, dark-haired, bird-eyed, oldish man, dressed shabby genteel, and wearing a slouch hat not unlike the popular idea of a harebrained anarchist.

Such was the description furnished to the police by a young gentleman who had his light suit and Panama hat "shockingly bespattered with ink, presumably by the notorious Jack."

One of the badly-directed squirts had hit him in the nape of the neck, causing him to turn sharply round. At the time the King in his carriage was turning into Bond-street and a little crowd had gathered to see and salute his Majesty.

It was at that moment of patriotic tension that the ink was squirted.

The victim followed the man of whom he has

given the above description, but the miscreant escaped in the crowd, his pursuer not liking to raise an outcry because he did not feel absolutely certain

that he was chasing the right man.

But he adds that, if he had caught the man, he has no doubt he would have been found to be the guilty person.

"What does Mr. Bernard Shaw know about hair ornaments?" demand a chorus of ladies. The Daily Mirror interviewed "G. B. S." yesterday

and found him prepared to stick to his statements.

He advised the Daily Mirror to seek out the lady who wore a dead bird in her hair and ask her the following questions:—

Why did she do it? Did she think it becoming?

Did she think she belonged to a music-hall?

The lady who aroused "G. B. S.'s" wrath is a beautiful Parisann, as well known here as in Paris, a clever and charming woman whose writings are familiar to the English literary world.

"AYLMER'S SECRET."

Stephen Phillips' Play Produced by Benson Company at the Adelphi Theatre.

This "new" play by Mr. Stephen Phillips, produced last night at the Adelphi Theatre, looks as if it were really quite old. It is certainly very old-fashioned, and probably dates back to an early period of Mr. Phillips's career.

Aylmer is a scientist who has discovered the elixir of life. With this magic fluid he brings to life a lay figure, and, as soon as he sees it move, flies in terror from the room.

The lay figure wanders into the street and is

heard of no more for three months. At the end of that time it reappears, in very dirty clothes, but with clean hands and face, and falls in love with Alymer's daughter. Alymer takes this very unkindly, and has a violent scene with the being he has brought to life, in the course of which the poor lay figure dies, presumably of a heart attack.

This story is told with the aid of immense solide

quies, frequent intervals, and not very vigorous blank verse. It is acted vigorously enough, how-ever, by Mr. F. R. Benson, Mr. Henry Ainley, and Miss Mabel Moore.

The "Comedy of Errors," which follows, goes with a laugh from start to finish.

Vesterday a simpler note was struck. In place of the elaborate creations which a week ago ravished the senses at Ascot, the ladies were no doubt costly, but at the same time simple frocks of linen, holland, and muslin.

At first glance it appeared as if the "Simpler Life" had captured the "smartest set" in England, but those who knew told stories of the fabulous amounts paid for these innocent examples of the dressmakers' art.

White was predominant, though every delicate shade of pink, green, and blue was to be seen. The Ascot frock has gone, and the Henley frock reigns supreme in its place.

The jury disagreed and were discharged.

PENNIES WORTH TEN POUNDS.

Explanation of a Popular Delusion About the 1864 Coinage.

The annual report of the Comptroller of the Royal Mint, mentions a curious idea entertained by some of the public that pence of various years (those of 1864 particularly) possess a greatly enhanced value.

His lordship said there could be no doubt that there were many abuses of commerce. It was proved by the report of the London Chamber of Commerce some years ago on the question of secret commissions that secret commissions were

Fancy "Mr. Punch" called to account for libel! Mr. Punch, whom we always think of as the goodnatured Mr. Punch, is it possible he can have hurt

somebody in earnest?
When Mr. Augustine Birrell, K.C., entered Mr. Justice Darling's court yesterday, as "counsel for the defendants in the next case," it was felt that something humorous was going to happen. Something humorous did happen.

Mr. F. Moy Thomas, who for twenty-five years was private secretary to the late Sir John Robinson, the famous manager of the "Daily News," brought -in all seriousness, let it be understood-an action claiming damages for libel against Messrs. Bradbury, Agnew, and Co, the publishers and proprietors of "Mr. Punch," and against Mr. Lucy, who is better known to readers of "Mr. Punch" as "Toby, M.P."

In spite of the humorous nature of the environ-In spite or the numorous nature of the environment—Mr. Justice Darling was Judge, Mr. Birrell ready to birrell on the other side, and "Mr. Punch" as defendant—it was with all seriounness that Mr. Dickens, K.C., laid bare Mr. Moy Thomas's Prince and Princess To Dine Amid Far-

When Sir John Robinson died, Mr. Thomas was asked to take the papers he had left behind, and work them up into a book of reminiscences.

Mr. Thomas, with diffidence, did what he was asked, and the result was:

"Fifty Years of Fleet-street; Being the Recollections of Sir John Robinson."

"Made Him Out an Ass."

Mr. Lucy reviewed this book in "Punch" under

Mr. Lucy reviewed this book in "Punch" under the following heading:

"Mangled Remains; An Extract from the Recess Diary of 'Toby, M.P.'"

This review, declared Mr. bickens, so far from being in "Mr. Punch's "well-known, gentle, kindly, light-hearted style, was bitter, spiteful, and cruel, and reflected grievously on Mr. Thomas as an author. In fact, it made him out to be an ass.

"A what?" asked Mr. Justice Darling. The humour of the environment was now asserting itself.

humour of the environment was now asserting itself.

"An ass," repeated Mr. Dickens loudly, and
there was a loud outburst of laughter.

Mr. Dickens then particularised the wrongdoing of "Toby, M.P." "Toby" had accused Mr.
Thomas of failing to use splendid material in the
actual words of Sir John Robinson, and of writing
whole chapters in the first person in order to glorify
himself; also of taking Sir John's matter and
putting it before the public as his own.

"Toby, M.P.," had even said: "When the poor
man speaks for himself he (Mr. Thomas) puts him
in small type."

"I see," said Mr. Justice Darling, who had been
looking through Mr. Thomas's book, "that there
are several very nice references to Mr. Lucy, quite
the reverse of the expression you mentioned."

Mr. Dickens (anxiously): Mg. Lord, it was not

in which "Toby, M.P.," who was wearing a largebutton-hole, presumably gathered in "Barkshire,"

Mr. Dickens had a theory to account for the action of the "Coby, M.P.," on Mr. Thomas. The two had been on the "Daily News" together, and had not spoken to one sayther since "Toby, M.P.," had refused to take part in a complimentary dinner (described by "Toby, M.P.," as a "grotesque farce.") to Sir John Robinson.

The case was adjourned in a humorous manner.

Directly a start was made yesterday, eleven o'clock, it was seen that the w playing much faster than on Monday, a tendency to kick. Obviously, therefore, lish committee acted very wisely in Warren, who was bound to bowl well on of this description.

Disaster attended the Australians, practically from the outset, as in Warren's fourth over Trumper played a fraction of a second late, and cut a ball into his wicket, very much in the same way as Tyldesley and Hayward lost their wickets on Monday.

Worse followed, as Hill was caught and bowled trying to hit Hirst, and Noble flicked a rising ball into Hayward's hands at second slip, the Surrey professional bringing off a neat catch. Armstrong joined Duff, who was playing a fine, free gameplaying, indeed, more as if there were 200 on the board for no wickets than three for 37.

Armstrong's Luck.

Armstrong had a bit of fat before he got off the mark, being beaten by a fast one from Warren, which he snicked between his legs and the wicket. This appeared to do him good, and he went for the bowling hammer and tongs, being especially severe on Blythe, who had gone on for Hirst.

Blythe, however, had his revenge on Duff, who had also been boxing him pretty hard, Lilley snapping him cleverly at the wicket. The fatal ball was a shortish one, which Duff tried hard to cut past cover. Followed Hopkins. After sitting quiet for a couple of runs he had a dig at Blythe, cutting him square for 4 and driving him twice for the same number. This brought on Haigh for Blythe, and Warren, who was no doubt being sayed for the rabbit-shooting season, was relieved by Basanquet. In Bosanquet's second over Hopkins had the slices of luck off the two first balls, hitting the first sits where first slip would ordinally be for 4.

MONEY A DRUG IN THE MARKET.

Slackness of Business in Most Sections on 'Change.

BARNATO FINANCE.

CAPEL COURT, Tuesday Evening .- By all the tokens the stock markets should have been cheerful to-day. They were cheerful, but not perhaps quite so good as might have been expected. That was merely due to the slackness of business in most sections. Money is almost a drug in the market, but people are talking about the coming Japanese loan and one thing or another. So, although politics made a much better showing, and generally speaking, everybody seemed satisfied, and there was a big arrival of gold, yet Consols

There were very few real checks to the market. The Kaffir section had a slight one. It started off gaily, but the public were doing nothing, and there seemed a little selling by way of Paris, which was said to be on-behalf of some of the interests received a supporting the market, in the paried of cently supporting the market in the period of depression. GRAND TRUNK RALLY,

The Grand Trunk traffic was quite a pleasant surprise. Most people had expected certainly £15,000 decrease. The decrease was only £6,704.

213,000 decrease. The decrease was only 26,704. This seemed to encourage country buying orders, and the speculators were quite busy in Grand Trunks. The Canadian Pacific traffic was nothing to boast about, being only 13,000 dols. increase. As usual, it was the Foreign Railway group which provided most attractions. But several securities which have been recently so prominent were a shade easier to-day. They quoted United of Havana Preferred excipits to the new Preference issue. These rights were valued at 21, and the Preferred was quoted at 152. It was rather interesting to note evidences of an awakening in the Mexican group of railway securities.

The Foreign bourses seemed in a more confident mood, and were disposed to put their security.

The Foreign bourses seemed in a more cond-dent mood, and were disposed to put their secu-rities higher. Brussels, for instance, was buying the Brazilian scrip at § premium. There seemed a disposition to pick up Chinese securities. There was a good tendency for all the usual bourse favourites, and, whether due to the surrender of-one of the rebel battleships or not, RwSians rose 21. The coming of the Jayanese loan seemed rather to damp the enthasisan for Japanese descriptions, and caused the new scrip to be sticky at 24 premium.

TWO MEN.

ATIONS may be judged by the kind of men they delight to honour and to put into positions of responsibility and trust. Tried by this test, how would Britain stand in the estimation of an intelligent observer, say, from the planet Mars?
Would it not surprise him to find that such

a man as Dr. Barnardo has worked for over forty years at his self-allotted task of "saving the children" without any assistance from or recognition by the Government of the

A letter now in circulation, signed by many names of influence, including bishops, peers, M.P.s, and other public men, says of Dr. Barnardo that he "has rendered services infinitely greater and more lasting than most of the ex-ploits which are rewarded by national grants, by Parliamentary votes of thanks, or by titular honours.

This is no oratorical flourish. It is literally and exactly true. As long ago as the days when he was a medical student, Dr. Barnardo, who is now close on sixty, was troubled by the pitiable lot of the children of the slums. He saw the vital importance to the nation of rescuing as many of them as possible from their wretched surroundings and bringing them up to be good citizens instead of wastrels and degenerates.

He set to work, single-handed, to do this, and to-day there are thousands upon thousands of men and women all over the world who rise up and call him blessed. He gave them the chance to become honest, contented workers. He stopped them from developing into loafers

Do we not need the counsel of such a man as this in Parliament? Is it not to the possessors of far-seeing minds and exceptional organising abilities that we ought to look for assistance in the task of Government?

What would the observer from Mars say

when he learnt that, while we set no store by Dr. Barnardo, we cheerfully entrust a share in the direction of our destinies to people like the late Lord Anglesey and the present Lord Rosslyn

This latter ornament of our hereditary peerage, having exhausted all other means of calling attention to his lack of sense and de cent feeling, has now distinguished himself by a cowardly attack upon the Queen, suggesting that her Majesty is responsible for the exclusion of motor-cars from Hyde Park.

Of course, no one pays serious attention to anything that is said by a peer who had not brains enough to make a passable actor. It is impossible, however, to feel sanguine about the future of a country which permits such a buted to his class, to take part in the making of its laws.

To return (a pleasant change) to Dr. Bar-To return a piessant change to Dr. Barnardo, there is now a splendid opportunity for us to do individually what, to our loss and shame, we have not done as a nation. MORNING'S GOSSIP. THIS

HE King left London yesterday afternoon for his second visit to Newmarket, where he is to stay at the Jockey Club Rooms, quite informally and quietly, until Friday. On Friday there is another state ball at Buckingham Palace, which will require his Majesty's presence for his long-expected week-end at Lord Redesdale's Gloucestershire seat, Batsford Park. Now it is practically certain that he will go to Marienbad as usual after Cowes Regatat week in August. NAVAL MANCEUVRES IN THE CHANNEL.

This year's naval manœuvres set a most interesting problem. It is sought to solve the possibility of a force of hostile gunboats and torpedo-boats being able to pass down the English Channel without being brought to action by a home force stationed at the various naval ports. In the photograph are seen ships of the hostile force endeavouring to elude the vigilance of the British Squadrons.

When the race was first started France was far ahead of the world in the motor-car industry, but Mr. S. F. Edge's win for England in the third race showed that that supremacy could be challenged. By the rules of the contest the race takes place in the country which holds the trophy, so the race of 1903 was held in Ireland and won by Germany. Last year's race in Germany was won by France, where, accordingly, it is to be decided

And it looks as though France would repeat her success, for Thery, last year's winner, is driving again, and has in the meantime won the French eliminating trials over the course on which the race itself is being run.

England holds a proud distinction. She has never once been represented in the race by anyone but an Englishman, a thing which is by no means the rule with the other competing countries. Two of the drivers in the German team this year are Belgians, Jenatzy and De Caters; and Burton, of the Austrian team, is an Englishman.

of the Austrian team, is an Englishman. Germany has always experienced the greatest difficulty in finding a native team of drivers for her cars, and the reason is not far to seek. The German Automobile Club is exceedingly exclusive—the most so in Europe—and the aristocratic German has not taken well to sports which involve any considerable amount of danger. The Belgians who represent the Fatherland this year have done so for three years in succession, and in 1903 the third member of the team was an Englishman.

THE SOCIAL SIDE OF MOTORING.

The French Automobile Club is not nearly so ocially exclusive as the German, but France has socially exclusive as the German, but France has twice been represented by foreigners, once by a Belgian and once by an Englishman, while an American artist, Mr. Heath, won both the Circuit des Ardennes race and the Vanderbilt Cup for France on a French car.

The French Automobile Club considers the English Automobile Club so democratic an insti-

tution that when the great motor shows are held in Paris it does not extend the privileges of mem-bership to the English club as it does to those of

other countries.

Until this year the successful motor-driver has reaped little but glory for himself and fame for the maker of the car, but in the recent French eliminating trials Thery made a good sum. There was a prize of £4,600 for the winning car, and this the makers handed over to him as well as a substantial bonus from their own pockets. He says he intends to retire after to-day's race.

Not one of the English team have been over the COURSE at Incign street, which will handleson them

course at racing speed, which will handicap them greatly to-day. Mr. C. S. Rolls, who is driving one of the Wolseley cars, is a son of Lord Llangattock, and Bianchi—an Englishman in spite of his name—who drives the other, was Jarrott's mechanic in the Irish race when they were both

The costs of both the French eliminating trials and the Gordon-Bennett race itself, will come to at least £12,000 this year. About two-thirds of this will be paid by the French clubs and the remainder by the challenging clubs.

Dexter must have merely spoken in this style to encourage him and minimise a big-hearted action. Nor was it possible to suspect avarice on the part of a man who merely asked five interest on an unsecured loan of 22,000. He raised her hand to his lips, and kissed it reverently.

The blood surged to the girl's white face. The tell-tale flush on Queenic's cheeks betrayed a woman's heart. And though she was far from understanding the fact, it was perhaps the first kindling of love. She realised but little more than that she had been drawn towards this old friend fint the though the control of the childhood's days from the first, and that she was drawn yet more closely to him by the long night of agony that they had spent together.

"My dear little girl," said Chester gently, "I shall do my best to help you find him."

"This came by the first post," she said, giving him a letter. It was addressed to her brother, but she had opened it. It was a formal letter from Mr. Hesper Mordaunt, enclosing a fortnight's salary, and dispensing with Mayheid's further services. Chester read the letter, and returned it without comment. It confirmed Dexter's statement.

"I will make inquiries at the Blue Star Line offices," he said. "But suppose we wait till this evening before deciding on any definite plan of campaign. This will give your brother a chance of communicating with us. Shall we leave it at that for the present?".

to a whisper. "You didn't sign anything that you

Chester experienced a curfous sensation.

Dexter?"

Because I know him-and I know of him, and I've never heard of him doing a disinterested action in his life."

"But what possible object could Dexter have in

trying to harm me?"
Yet the very question betrayed the fact that the possibility had at least occurred to Chester.
"I had to listen—somehow I couldn't help myself," replied Queenic quickly. HOW NERVE POWER MAY BE REGAINED

What is really wrong when such symptoms as the above are present is that the delicate nerve and brain tissue has been worn down, and what is needed is a remedy that will replace the wear-wave, tissue with new matter and isster its growth. That is precisely what Bishop's Tonules do. They are a combination of nerve-repairing elements which provide nutrition for nerve and brain. They supply the elements that are wanting, and under their influence the power for work, study, composition, and social duties gradually returns.

BISHOP'S TONULES A NERVE TONIC Bishop's Tonules are something entirely differentiation a general tonic or stimulant. was re-asserting itself. Nevertheless, the sight of
the offices recalled very vividly the nightnarish
happenings of the previous day and, as the commissionaire saluted and held open the door for
him, he experienced a curious feeling of nervousness.

"By the way," he said, addressing the com-missionaire. "Do you know Mr. Mayfield, from Mr. Mordaunt's office?"

"Yessir."
"Did he call here yesterday afternoon?"
"Yessir. Just as I was locking up. Asked for Devenish; then for Mr. Dexter. But both endemen had gone."
So Mayfield had called at the office! A wave of

uneasy remorse swept over Chester.
"He didn't happen to say where he was going?"

Eve Devenish was too well bred to scrutinise Chester, closely, but something about his face arrested her attention for a fraction of time.

"I'm sorry to say my father is not very well," she said. "It's nothing serious really, but he will not be coming to the office to-day, so he has deputed me to put you through your paces, Mr.

She gave a little musical laugh. Her eyes were May I prove apt," replied Chester smilingly

Eve's unexpected presence and the fascination of her personality, that had appealed to him so strongly in those Oxford days, had for the time dispelled other thoughts from Chester's mind, completely distracting him. But her action in bolting the panel brought back the happenings of the previous day, and conjured up a vision of Mr. Dexter.

"It leads through into Mr. Dexter softice," explained Eva Daintree, returning with a fascinating whisper of silk. "And Mr. Dexter is one of those quiet, Urinh-Heep type of men. You never know where he is quite, or what he is doing. She shrugged her superb shoulders. There was not the slightest effort on her part to hide her contempt. Noticing the expression of surprise that her outspokenness had conjured up on Chester's face, she laughed—a little harshly, if seemed to Chester.

"Oh, it's quite mutual, Mr. Chester. Mr. Dexter hates me quite as heartily as I had him. The only difference is that he takes the trouble so hide his antigathy; I don't."

Success crowned the efforts first of one player, then of the other. Brookes, the winner, only secured one game in the first set, and only last five games in the next two less. In the longth set less only got one game again,

STIRRING NEWS

FOR LONG SUFFERERS FROM OBESITY.

"Hope springs eternal in the human breast." There have been excessively stout people who, year after year, have persevered with "cures" and "régimes" for their obese condition without any result beyond the temporary reduction of weight due to semi-starvation and other weakening agencies. There are many others who have ruined, or partially ruined, their constitutions by old-time "remedies" which were based on poisonous mineral drugs and the abuse of cathartics. Even when these risky methods failed to have any very serious effect on exceptionally strong constitutions it was usually found absolutely necessary to give them up in course of time. And then, what happened? Simply this: as soon as the subject began to recuperate, and to eat with a normal appetite, the masses of subcutaneous fat began to redevelop, and the superabundant fatty matter once more began to clog the system and impede the natural action of the vital organs. And so the distressing process went on, until all the threatening consequences of excessive stoutness were too often realisedfatty degeneration of the heart and liver, weak circulation, impure blood, partial failure of the skin to carry off impurities, laboured breathing, gouty and rheumatic pains.

So much for the methods of the past generation-methods which unfortunately are not wholly obsolete. With the discovery of Antipon a few years back matters assumed a different aspect. It then became possible to permanently reduce weight and strengthen the body at one and the same time. This was indeed stirring news for stout people who had despaired of ever again getting thin, as well as strong, again and the Antipon Company are to be heartily congratulated on the ever-increasing success of their splendid remedy.

So potent a fat absorbent is it, that within a day and night of taking the first small dose Antipon will bring about a decrease of 8oz. to 3lb., according to the individual case, this being always followed by a reliable and steady daily reduction until the subject is satisfied with the amount of over-fat lost. Thenceforward the treatment may be dispensed with, for not only is the whole of the superfluous and diseased fatty matter expelled from the system, but the humiliating and disheartening tendency to "put on flesh" to excess is overcome, with the result that a normal amount of wholesome, muscle-forming, nerve-strengthening food may be taken without fear lest the fat should again cause trouble.

Antipon positively relies on the "feeding up" of the person undergoing the treatment. That is all the assistance called for, and as by its splendid tonic properties Antipon creates a healthy appetite the necessary assistance is easily provided. Unlike the remedies of old, Antipon builds up the system anew, nourishing the body thoroughly, whilst ridding it of unnecessary and dangerous fatty accumulations. No troublesome dietary rules need be observed, nor are exhausting physical exercise. sweating, purging, etc., at all necessary. A pon is a complete treatment in itself, and will make a new being of any person, however stout, who will carefully follow the very simple directions which accompany each bottle.

Antipon is a purely harmless vegetable compound in liquid form, pleasant and refres
